

XDB High Flow Inflator

The half-inch control valve found within the XDB is specially designed for inflating large (OTR) and multiple tyres. It can be used with a 4-way manifold kit, standard or large bore valves and also with core extraction tools.

The heavy duty, weatherproof and vandal resistant enclosure of the 89XDB makes it ideal for almost any indoor or outdoor location, including: transport yards, military vehicle depots, mining sites, coach and bus depots and aircraft hangers.

Tyre Inflation Units

89XDB-0008

Product Features

- Can be customised to any corporate image and language
- Rugged and attractive die-cast aluminium enclosure
- Easy installation
- Vandal resistant mechanical switches or optional piezo switches
- Impact resistant enclosure
- Nitrogen compatible

Technical Specifications

Construction	Die Cast Aluminium Enclosure
Degree of Protection	IP66
Power Requirements	12VDC, 100-120VAC or 220 240VAC
Unit of Measurement	psi / kPa / bar / kgcm ²
Operating Range	5-145psi / 35-1000kPa / 0.3-10.0bar
Accuracy ±	0.3psi / 2kPa / 0.02bar
