Bata Industrials

FOOTWEAR BEYOND SAFETY

Bata Industrials is a specialised division of the world's largest shoe manufacturer: the Bata Shoe Organisation. So our footwear incorporates more than 100 years of experience.

We combine this with the most advanced material and techniques and the latest insights into bio-mechanics to continually push the envelope of our capabilities. With one single overriding goal: to guarantee the wearers of our shoes optimum safety, health and comfort. This philosophy has won Bata Industrials an outstanding reputation in the better class of safety footwear.

FOOTWEAR BEYOND SAFETY

Safety remains very important in the work place. However, today's workforce demand more from their footwear. They want extreme comfort from shoes that look good but keep them fit and healthy at work at the same time.

That is why at Bata Industrials we are fully focused on the wear experience and perception of the men and women who wear our shoes. Every day their wishes and needs drive our efforts in research, development and design. Driving us beyond the current norms. Further in protection. Further in support. Further in fit and durability.

This means that Bata Industrials stands for 'footwear beyond safety'. Presented to you here in a renewed programme in which safety, health and comfort come together more attractively than ever before. For the most widely varying applications in the most widely varying jobs and trades.

Traxx®

Sudden, unexpected movements? Traxx soaks up the punishment with extra springiness and built-in shock absorbers in the heel. This ingenious Tunnelsystem® was developed in co-operation with Prof. Dr. W. Baumann, Professor for Biomechanics, among others. It also provides extra stability, by spreading the pressure over a larger surface area. Thereby making it super safe and comfortable.

The self-cleaning sole consists of different densities of TPU in order to offer the right protection at every point. Hard on the outside (wear resistance and stability), safety soft spots in the interior (antislip in all directions) and the torsion stabiliser which provides extra robustness and support with every movement. Furthermore, from the side, you can see the springy PU mid-sole, for optimum shock absorption and comfort. That's what makes up Quattro. Only available in Traxx.

Traxx® 19

Nubuck leather/Lycra.
Lycra Lining.
Sizes 5-13 Half Size 9½.
Selection Guide: ABCEFGHI

Traxx[®] 92

Thanks to the subtly pre-formed fore foot, Traxx facilitates the natural flexing of the foot. Thereby utilising less energy. It makes for supple motion and prevents tiredness. The Easy Rolling System[®] is a new development by Bata Industrials.

Traxx[®] 24

Traxx[®] 78

Whatever the weather, the internal climate in Traxx is always agreeable. Both the upper and the Bata VentAir[®] lining are of breathable materials, so that the feet always stay cool and dry and the wearer stays fit.

Spirit

Spirit

Bata Industrials is a specialized division of the World's largest shoe manufacturer, the Bata Shoe Organisation. Our safety footwear embodies over 100 years experience. We combine it with the most modern materials and technology, and the latest insights in the field of kinetics and hygiene, in order to expand our boundaries constantly. Everything is focused on guaranteeing the wearers of our shoes maximum health, comfort, and protection. The Spirit collection has been designed on the basis of this unique Bata Industrials trinity.

With an eye for detail and unsurpassed attention to wear comfort and design, Spirit not only looks good but also has built in features to meet the demands of today's workforce. Dual density cushioned soles featuring polyurethane and TPU components, plus poron inserts, full comfort insoles, and Bata's unique energy returning Tunnel System, provide exceptional under foot comfort. Latex toe cap linings, cushioned heel cups, and breathable linings to keep feet fresh and dry, lead to new levels of comfort in safety footwear. Every shoe and boot in the Spirit collection is also anti-static.

Spirit will set new standards for safety footwear that is both a pleasure to wear and be seen in.

 Selection Guide: ABCEFGHI

The Spirit sole design has been inspired by the principles of grip, and the structures of skin and feet in the natural world. Known as bio-mimicry, this way of designing observes how creatures combine the pressure of pure weight and the structure of their feet to grip to the surfaces they stand on. In the Spirit collection the sole design has been constructed in an innovative way with flexible and durable polyurethane for extra absorption, and TPU for further stability and sideways slip resistance, providing excellent grip in all directions. The Spirit sole design also features the famous Bata Tunnel System for energy return.

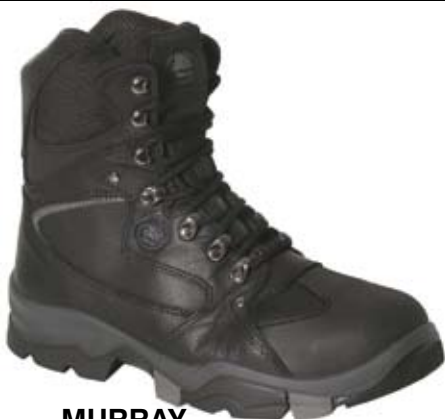

MINEMASTER

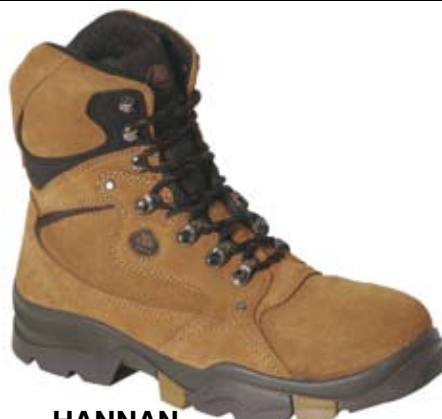

MINEMASTER

MURRAY

HANNAN

MineMaster has been developed specifically for the mining industry. Featuring premium leather uppers with breathable linings, the application of latest technology means that MineMaster is fully waterproof. Steel toe caps and midsoles, along with TufTec mudguards and TPU reinforcements at the toe and heel give all round foot protection. Even on the longest shifts, MineMaster offers exceptional comfort through cushioned dual density PU/Rubber soles, soft and flexible uppers featuring padded collars and tongues, and a padded calf flex point. MineMaster also has a speed hooks lacing system for simple access, removal, and adjustment.

Bata Industrials®

Dual Density Rubber

The DDR (Dual Density Rubber) collection provides comfort in harsh conditions. The sole has a lower density midsole for cushioning under foot, whilst the higher density outsole provides strength and durability. Soles are heat resistant to 300°C. The Vulcan smelter boot features a built-in metatarsal guard for complete upper foot protection, and quick release velcro fastening. Kevlar stitching and fire resistant leather make Vulcan the ideal boot for smelter conditions.

GUMBOOTS

jobmaster

Our famous Jobmaster boots are considered to be the industry standard. Made from injected PVC specially formulated for the correct work application, they are reinforced at the heel, ankle, and shin for extra protection. Linings are of washable natural cotton. Jobmaster soles are oil, acid, and abrasion resistant. The tyre tread sole design allows for improved liquid dispersal and improved slip resistance, whilst the Tunnel System reduces heel shock and wearer fatigue. Jobmaster gumboots feature a full comfort insole and offer great comfort for even the longest of work shifts.

Bata Utility gumboots are synonymous with Australian industry, and are widely used across a variety of applications. The utility design is a favourite in the workplace. It is reinforced at the heel, ankle, and shin and is both durable and flexible. Channeling in the sole allows for improved liquid dispersal and slip resistance. Utility gumboots are fully lined and have kick off lugs at the heel, making them easy to slip in and out of.
