

clipper[®] BBL Block Saw

clipper ► BBL Block Saw

The new Clipper heavy duty Block Saw is the most versatile block saw on the market, equipped with either 3 phase 4kw electric motor or the new powerful 9.6kw (13HP) Honda petrol option, offering a BBL saw for all working environments.

BBL - Block Saw

The new open back design feature allows the BBL Block Saw, to rip-cut longer length materials, as well as standard size blocks. A new balanced cutting head also features a handle ergonomically positioned for maximum operator comfort.

Features

- 9.6kw Honda engine with cyclone air filtration or 4kw CMG electric motor
- Power enhancing jackshaft on the petrol machine
- Extended length water pan and open back
- Tilt lock conveyor wheels on the water pan
- Specially designed balanced cutting head
- Rugged all steel frame with forklift brackets

Benefits

- Provides maximum engine protection
- Transmits more torque & power to the blade
- Allows rip cutting of larger masonry materials
- Greater stability when loading materials on cart
- Provides effortless cutting depth positioning
- Provides easy transport and storage
